CABINETS

> Specially designed cabinets for maximum file storage - Up to 60% space saving compared to conventional storage cabinets

A versatile storage solution

FSI Tambour Door Cabinets are designed for maximum file storage options, with adjustable shelving configuration in 25mm increments. The cabinets are available in a large variety of heights and widths, allowing for combined storage and filing utilisation in one cabinet.

These Australian made cabinets are of fully welded construction with adjustable levelling feet, making them a strong and streamlined office storage solution.

< Tambour Door Cabinet

Cabinets are available in various sizes, all with dual sliding doors and single point lock system with individual key sets

< A full range of filing accessories are available

CABINETS

> These cabinets are fitted with steel doors, lock and a reliable door mechanism that smoothly recedes into the cabinet sides. Offering minimum protrusion with a secure and space efficient storage solution.

> The doors are extra wide, giving maximum access to filing and storage on each side

Various heights & widths available

SHELVING

MOBILE SHELVING

Trolley and wheelchair friendly

Self-Based Manual Mobile Shelving

Rigid Welded Steel Trolley and Track System

Bases are fabricated from heavy-walled galvanised square steel tube, rather than formed from sheet metal. Bases and trolleys are fully welded and are manufactured from heavy-gauge BHP steel, forming a rigid one-piece platform that the shelving sits on. Case-hardened load-bearing wheels, capable of carrying weight far greater than the maximum capacity of the unit, are used on each mobile trolley.

Standard or slotted shelves for use with metal file supports >

< Free-Track Mechanical Assist Mobile Shelving

Low Profile Track System for Easy Access

Mechanical assistance requires minimal effort thus reducing OH&S manual handling injuries. Unique personnel aisle safety lock, disengages mobile units whilst operator is in an aisle, eliminating the risk of injury caused by personnel being "trapped" in an aisle. The tracks sit directly onto any floor surface, avoiding installation and disruption costs. Additional bays can be added at a later stage or relocated, saving you time and money.

< Ergonomically designed wheel promotes easy operation

Mechanical Assist Mobile Shelving Heavy bays are easy to move using mechanical assistance - the friction between the wheels and track is increased as the unit is loaded, ensuring no slippage during movement

Available in handle or wheel operation
